Course Overview

A two-day, hands-on course in content strategy with multi-agent AI workflows. Learners take one business — Horizon Wealth Planning, an independent financial-planning firm in Singapore with a website and no marketing team — and build it an AI marketing team: a Marketing Team Lead and five specialists (Growth Strategist, Content Creator, Creative Designer, Website Designer, Growth Analyst), each with instructions, skills and connectors. Day 1 forms the team and runs its first campaign; Day 2 runs a social week, a newsletter with a landing page, a YouTube explainer and an always-on weekly report, with a person approving every external piece. This Claude Edition uses Claude Code subagents and agent teams, Claude connectors and scheduled tasks, and publishes pages as Claude artifacts.

Course code C1034 · 2 days · 15 instructional hours · 164-slide deck v1.0 · 15 labs, each in its own folder.

Learning Outcomes

By the end of this course, participants will be able to:

- **LO1.** Conceptualize content ideas to meet marketing objectives and map out digital storyboards as part of a content strategy.
- **LO2.** Identify content requirements from customer preferences and determine the frequency of marketing content.
- **LO3.** Determine content types and styles and decide on modes and processes for distributing content.
- **LO4.** Develop guidelines for content strategy execution using appropriate delivery modes and responsible AI practices.

- Each learner: a laptop with the Claude desktop app on a Pro plan or above (Claude Code and artifacts are not on the Free plan), signed in with their claude.ai account. Learners type no commands: each lab says whether to use Claude or Claude Code.
- Installed by the trainer before class: Claude Code, Node.js 22, Python 3 with Pillow and ffmpeg (they run the approval gate and the video). A personal Google account (Drive, Gmail, Calendar). A free Firecrawl account (1,000 credits a month, no card) for web research; Anthropic's Marketing plugin (free, added in Lab 4).
